

COMMUNITY MATRIX SPECIFICATION

The Complete Participant Manual: One-Time \$30 Capital Entry, 14-Node Deterministic Routing, and 12-Slot Autonomous Scaling

CAPITAL ENTRY	SLOTS 2–12 BUYS	DIRECT CASH ROI	HIGHER SLOT UPGRADES
STRICTLY \$30 (SLOT 1)	PROGRAMMATICALLY BARRED	600% PURE CASH (\$180)	100% FREE VIA NODES 4 & 5

1.0 THE SINGLE \$30 CAPITAL ENTRY PARADIGM

The Equora Community Matrix is engineered to eliminate financial barriers and eradicate predatory capital calls. Unlike conventional platforms that compel participants to continually inject fresh out-of-pocket funds to upgrade levels, Equora enforces a strictly **one-time capital entry of \$30.00 USD**.

Direct manual purchases of higher slots (Slots 2 through 12) are prohibited at the smart contract level (`require(slot == 1)`). All upward advancement across the 12-slot ladder is financed 100% autonomously through internal matrix yield generated by Nodes P4 and P5.

2.0 THE 10-STEP PARTICIPANT LIFECYCLE

From wallet connection to recurring matrix cashflow, the participant journey operates through ten deterministic steps:

- Web3 Wallet Connection:** Connect Trobsafe or any compatible non-custodial Web3 wallet. Zero email, password, or KYC credentials required.
- Referral Lineage Binding:** Enter the 5-digit referral code of your sponsor. The cryptographic bond is written permanently to `EquoraRegistry.sol` on Trobium.
- Slot 1 Activation (\$30):** Authorize and deposit exactly \$30.00 USD in live TROB Coin. This represents the only personal capital you will ever deposit.
- Matrix Node Placement:** The smart contract positions your Root Node 0 within your sponsor's active 14-node binary tree.
- Upline Pass-Up (P1 & P2):** Positions 1 and 2 pass up \$60 (\$30 each) to qualify direct upline sponsors and expand network depth.
- Break-Even Cash Fill (P3):** Position 3 triggers an instant push payout of \$30.00 USD directly to your personal wallet, achieving 100% capital recovery.
- Autonomous Upgrade & Pools (P4 & P5):** Positions 4 and 5 route \$60 total to the 4 Protocol Pools via EquoraVault. In the exact same block, the contract unlocks Slot 2 (\$60 value) with \$0 out-of-pocket capital!
- Direct Cash Fills (P6, P8, P9, P11, P12):** Receive an additional \$150.00 USD pushed directly to your wallet ($\$30 \times 5$ nodes), bringing net cycle cash to \$180.00 (600% ROI).

9. **Team Spillover Injection (P7, P10, P13):** Three node fills (\$90.00 total) flow directly to downline team members, accelerating overall team velocity.
10. **Matrix Board Recycle (P14):** Position 14 recycles your matrix board into a fresh Cycle 2, while routing \$30 to the 4 Protocol Pools.

3.0 14-NODE MATRIX MECHANICS (\$420 GROSS ALLOCATION PER \$30 CYCLE)

Every \$30 slot cycle generates exactly 14 node fills totaling **\$420.00 USD**. Table 1 details the deterministic routing of each node:

NODE POSITION	HIERARCHY TIER	SYSTEM FUNCTION	CAPITAL RECIPIENT	SETTLED AMOUNT
P1, P2	Level 1	Upline Pass-Up	Direct Sponsor Wallets	\$60.00
P3	Level 2	Direct Cash Payout	Participant Wallet (100% Breakeven)	\$30.00
P4, P5	Level 2	Protocol Pools & Auto-Upgrade	4 Protocol Pools & Slot 2 Unlock	\$60.00
P6	Level 2	Direct Cash Payout	Participant Wallet	\$30.00
P7, P10, P13	Level 3	Downline Team Spillover	Active Downline Team Nodes	\$90.00
P8, P9, P11, P12	Level 3	Direct Cash Payout	Participant Wallet (\$30 each)	\$120.00
P14	Level 3	Board Recycle & Protocol Pools	4 Protocol Pools & Re-seed Board	\$30.00
TOTAL SETTLEMENT INFLOW & OUTFLOW				\$420.00

3.1 CASHFLOW EXECUTION & POOL FUNDING

The contract ensures continuous capital velocity across all matrix cycles:

- **6 Direct Cash Nodes:** Positions P3, P6, P8, P9, P11, and P12 disburse \$30.00 each, providing **\$180.00 pure cash (600% ROI)** on every cycle.
- **Nodes 4, 5, and 14 Feed the 4 Protocol Pools:** Positions P4, P5, and P14 (\$90 total per board) route directly into the four automated protocol vaults: 35% Ecosystem & DAO (\$31.50), 40% Salary (\$36.00), 15% Level Rewards (\$13.50), and 10% Magic Blind Box (\$9.00).
- **Cycle 1 Autonomous Upgrade:** On Cycle 1, Nodes P4 and P5 accumulate \$60, automatically unlocking Slot 2 (\$60 value) with zero personal capital.

4.0 THE AUTONOMOUS 12-SLOT GEOMETRIC SCALING TABLE

Table 2 outlines the mathematical doubling hierarchy across all 12 matrix levels. Progression requires zero personal capital beyond the initial \$30 deposit into Slot 1:
