UI/UX DESIGN DIRECTIVE:

The DAO member portal must not look like an MLM or retail matrix dashboard. It should look like an institutional Web3 private wealth terminal. Use obsidian-black backgrounds (#06080F), sovereign gold accents (#F59E0B), emerald glowing metric values (#00E599), and monospace numbers.

1.1 Strategic Plan: Segregation of DAO vs. Normal Matrix Users

Feature Dimension	Normal Matrix Users (Retail)	Genesis DAO Council (VIP Sovereign)
Access Barrier	Tiered entry from \$30 (Slot 1) up to \$61,440 (Slot 12)	Flat 300 TROB (\$300) one-time buy-in
Referral Requirement	Requires 2 direct referrals to qualify for withdrawals	ZERO REFERRALS (0) – 100% Pure Co-Ownership
Payout Engine	Cyclical 14-position single-leg matrix (600% direct cash)	Instant 300 / N Cashback + Direct Distribution
Network Royalties	Earnings tied to personal downline & team spillover	Permanent 35% cut of ALL network-wide matrices
Governance Identity	Standard 5-digit referral code account (#10042)	Soulbound Non-Transferable ERC-721 NFT (#01-#100)

Feature Dimension	Normal Matrix Users (Retail)	Genesis DAO Council (VIP Sovereign)
Earnings Lifecycle	Recycles upon Node 14 completion (Cycle 1, 2, 3...)	Permanent queue; 5X (\$1,500) cap with 48h re-topup

2. CORE MATHEMATICAL MECHANICS (DESIGNER REFERENCE)

The smart contract enforces a strictly zero-debt, instant peer-to-peer distribution formula on every join: $\text{Payout Per Member} = \frac{300}{N}$ Where N is the total active seat count **including the incoming member**.

Seat Number (\$N\$)	Gross Deposit	Instant Cashback to Joiner	Redistributed to Prior Members	Net Out-of-Pocket Cost
Seat #1 (Genesis Alpha)	\$300.00	\$300.00 (300 / 1)	\$0.00 (No prior members)	\$0.00 (100% FREE!)
Seat #2	\$300.00	\$150.00 (300 / 2)	\$150.00 to Seat #1	\$150.00
Seat #3	\$300.00	\$100.00 (300 / 3)	\$100.00 to #1, \$100.00 to #2	\$200.00
Seat #4	\$300.00	\$75.00 (300 / 4)	\$75.00 each to #1, #2, #3	\$225.00
Seat #10	\$300.00	\$30.00 (300 / 10)	\$30.00 each to Seats #1-#9	\$270.00
Seat #50	\$300.00	\$6.00 (300 / 50)	\$6.00 each to Seats #1-#49	\$294.00
Seat #100 (Final Seat)	\$300.00	\$3.00 (300 / 100)	\$3.00 each to Seats #1-#99	\$297.00

✓ ZERO-DEBT INVARIANT:

Total payouts on every join are strictly: $\sum_{i=1}^N \frac{300}{N} = N \times \frac{300}{N} = 300$ TROB\$.

The smart contract never creates unbacked liabilities, never borrows from future reserves, and settles immediately on-chain.

✦ 2.1 The 5X (\$1,500 TROB) Earnings Cap & 48-Hour Urgency Window

5X Cap Limit: Each 300 TROB deposit entitles the member to earn up to **\$1,500 TROB (500%)** in cumulative earnings.

Safe Zone (0 – \$1,200): Progress bar is green. Member earns passive dividends uninterrupted.

Advisory Zone (\$1,200 – \$1,499): Amber bar. Alerts user that re-topup will soon be required.

Critical 48h Countdown (\$ge \$1,500): The card turns crimson. A 48:00:00 digital clock starts. A 300 TROB re-topup resets the cap and preserves the seat index.

Default & Sniping: If 48h expires, the seat turns into a *Defaulted Vacant Seat* claimable by any new user.

3. COMPONENT-BY-COMPONENT DATA SCHEMAS ("SATA" SPECIFICATIONS)

Below are the exact data models, smart contract functions, data types, and live values that the UI must display across each section of the page:

✦ 3.1 Genesis Council Scarcity & Capacity Header

UI Element	Contract Function	Type	Live Production Value	Empty / Fallback State	Formatting Rule
Seats Claimed	<code>EquoraDAO.getDAOStats().memberCount</code>	uint256	86	0	Decimal integer
Total Capacity	<code>EquoraDAO.MAX_MEMBERS()</code>	uint256	100	100	Fixed constant
Seats Remaining	<code>EquoraDAO.getRemainingPositions()</code>	uint256	14	100	Highlight gold if < 20
Capacity Progress	<code>(memberCount / 100) * 100</code>	percent	86.0%	0%	Emerald progress bar
Genesis Deadline	<code>EquoraDAO.GENESIS_WINDOW_END()</code>	uint256	1,791,240,000	Active	Digital clock: DD:HH:MM:SS
Total Distributed	<code>EquoraDAO.getDAOStats().totalDistributed</code>	uint256	25,800.00 TROB	0.00 TROB	2 decimals + Monospace

✦ 3.2 Soulbound NFT Governance Identity Card

UI Element	Contract Function	Type	Live Production Value	Empty / Fallback State	Formatting Rule
Is Member	<code>EquoraDAO.getMemberDetails(addr)[0]</code>	bool	true	false	If false, show visitor view
Seat Index	<code>EquoraDAO.getMemberDetails(addr)[1]</code>	uint256	12	0	Format: Council Seat #12
NFT Token ID	<code>BTitanDAOMembership.tokenOfOwnerByIndex(addr, 0)</code>	uint256	#0012	N/A	4-digit padded number
Owner Address	<code>userAddress</code> (from Web3 provider)	address	0x4B71a ... 89F2	Not Connected	Shortened 0x... with copy icon
Voting Weight	Fixed constant: 1 / 100	percent	1.0%	0.0%	Tag badge: 1 Seat = 1 Vote
Soulbound Status	<code>BTitanDAOMembership.isSoulbound()</code>	bool	true	true	Lock icon: Non-Transferable

✦ 3.3 5X Earnings Cap (\$1,500 TROB) Health Monitor

UI Element	Contract Function	Type	Live Production Value	Empty / Fallback State	Formatting Rule
Cumulative Earned	<code>EquoraDAO.getMemberDetails(addr)[4]</code>	uint256	840.00 TROB	0.00 TROB	Formatted ether, 2 decimals

UI Element	Contract Function	Type	Live Production Value	Empty / Fallback State	Formatting Rule
Max Cap Ceiling	EquoraDAO.getCapProgress(addr)[1]	uint256	1,500.00 TROB	1,500.00 TROB	Fixed constant (\$300 × 5)
Cap Percentage	(earned / 1500) * 100	percent	56.0%	0%	Dynamic: Green / Amber / Red
Cap Triggered	EquoraDAO.getMemberDetails(addr)[5]	bool	false (isCapped)	false	If true, activates 48h clock
48h Countdown	EquoraDAO.retopupTimeRemaining(addr)	uint256	172,400s (47h 53m)	0s	Digital clock HH:MM:SS
Seat Blanked Flag	EquoraDAO.getMemberDetails(addr)[7]	bool	false (isBlank)	false	If true, seat is defaulted

4. COMPONENT DATA SCHEMAS (PART 2) & INTERACTIVE STATES

4.1 Claimable Revenue & 1-Click Withdrawal Hub

UI Element	Contract Function	Type	Live Production Value	Empty State	Action / Interaction
Matrix Pool Claimable	<code>EquoraDAO.getMemberDetails(addr)[8]</code>	uint256	300.00 TROB	0.00 TROB	1-Click Claim Action
Fallback Claimable	<code>EquoraDAO.getMemberDetails(addr)[3]</code>	uint256	120.50 TROB	0.00 TROB	Auto-swept on Claim
Total Withdrawable	<code>poolClaimable + fallbackClaimable</code>	uint256	420.50 TROB	0.00 TROB	Large emerald header ticker
Gas Fee Estimation	<code>Provider estimateGas()</code>	string	< \$0.005 USD	~ \$0.005	Monospace footnote

4.2 100-Seat Council Grid Tile Array Data

The 100 tiles on the holographic council matrix are generated by querying `EquoraDAO.getAllMembers()`.

Tile Element	Contract Property	Type	Values / States	Visual UI Representation
Seat Index	<code>arrayIndex + 1</code>	uint8	1 to 100	Centered tile numeral label
Occupant Address	<code>members[i].memberAddress</code>	address	0x4B71...89F2	Tooltip flyout occupant line
Seat Status	<code>State evaluation</code>	enum	CLAIMED, USER, NEXT, DEFAULTED, LOCKED	Tile background and border color
Cumulative Yield	<code>members[i].totalEarned</code>	uint256	1,280.40 TROB	Tooltip flyout earnings metric
Cap Health %	<code>(totalEarned / 1500) * 100</code>	percent	85.3%	Tooltip flyout mini progress bar

4.3 300 / N Dynamic Calculator State Schema

UI Field	Calculation Formula	Type	Example at Seat #35	Example at Seat #1 (Genesis)
Selected Seat (\$N\$)	<code>User slider position (1..100)</code>	integer	35	1
Gross Entry Fee	<code>Fixed deposit constant</code>	number	\$300.00 TROB	\$300.00 TROB
Instant Cashback to Joiner	<code>300 / calcSeat</code>	number	\$8.57 TROB	\$300.00 TROB (100% FREE!)
Split to Prior Members	<code>300 / calcSeat to each</code>	number	\$8.57 each (\$291.43 total)	\$0.00 (No prior members)
Net Out-of-Pocket Cost	<code>300 - (300 / calcSeat)</code>	number	\$291.43 TROB	\$0.00 (FREE!)

5. VISUAL 10X10 COUNCIL MATRIX & DESIGN TOKENS

The 100 Genesis Council seats are arranged in a 10×10 responsive matrix grid. Each tile exhibits one of five strict visual states:

01	02	03	04	05	06	07	08	09	10
11	★12★	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	⚡ 44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	⚡ 87	88	89	90
91	92	93	94	95	96	97	98	99	100

- Claimed Seat (Gold)
- Your Personal Seat (Emerald Crown)
- Next Available in Line (Cyan Pulse)
- Defaulted Vacant Seat (Crimson Dashed)
- Future Unclaimed Seat (Slate)

5.1 Visual Design Tokens & Styling

Design Token	Hex / Value	Semantic Application in DAO Interface
Base Obsidian	#06080F	Full page background (deep void aesthetic)
Slate Card Surface	#0B111E (Blur 16px)	Elevated container surfaces with glassmorphism
Sovereign Gold Accent	#F59E0B / #FBBF24	Primary buttons, VIP badges, seat crowns, and headings
Radiant Emerald	#00E599	Cashback values, claim buttons, positive yields, safe zone
Urgency Crimson	#EF4444	48h countdown clock, default warnings, vacancy alerts
Cyber Cyan	#06B6D4	Next seat in line indicator, interactive simulation sliders
Headline Typography	Cinzel / Cabinet Grotesk	Institutional titles, council badges, VIP prestige cards
Monospace Typography	JetBrains Mono	All monetary numbers, TROB amounts, countdown timers

5.2 Designer Figma Deliverables Checklist

- REQUIRED FIGMA FRAMES & ARTIFACTS:
- Frame 1 (Desktop 1440px): Public DAO Council Gateway (Pre-Claim state with Scarcity Meter).
 - Frame 2 (Desktop 1440px): Active Member Command Center (Soulbound NFT, Yield Meters, 1-Click Claim).
 - Frame 3 (Desktop 1440px): 10×10 Council Seat Map with all 5 state variations & Hover Flyout.
 - Frame 4 (Desktop 1440px): 300 / N Dynamic Calculator with draggable slider and breakdown tiles.
 - Frame 5 (Modal): 48-Hour Urgency Re-Topup Countdown Modal with digital flip clock.
 - Frame 6 (Modal): Defaulted Vacant Seat Sniping & Takeover Flow.
 - Frame 7 (Mobile 390px): Responsive Mobile DApp layouts for iOS / Android Web3 wallets.
