EXCLUSIVE PHASE 1 SCOPE

The user interface is 100% focused on Genesis DAO co-ownership during Phase 1. Matrix Slot 1 (\$30 ID) is locked behind a 21-day countdown timer. On Day 22, the matrix unlocks and begins filling seats dynamically!

Platform: Polygon /
Trobium Network

Security: Hardhat Core Protocol
(34 Tests Passing)

Launch Window: Phase 1 (Days 1–21) - **Status:** Approved Dedicated
> Phase 2 (Day 22+) Phase 1 Scope

I. STRATEGIC PLAN: PHASE 1 (DAYS 1–21) VS. DAY 22 MATRIX LAUNCH

The client has confirmed that the protocol must launch with **Phase 1 strictly focused on the Genesis DAO Council**. Designers must not present retail matrix recruitment as active today.

💡 DESIGNER DIRECTIVE (PHASE 1):

The UI must make users feel the urgent scarcity of the 100 seats. Explain to users: "Secure your seat in the Genesis Council during Phase 1. When the 21-day timer hits zero on Day 22, normal users will enter the \$30 matrix, and 35% of all their transactions will flow into YOUR DAO Treasury!"

2. PRIMARY SCREEN: GENESIS DAO COUNCIL (/DAO)

This is the primary operating screen during Phase 1. Users inspect the 100-Seat Grid, claim passes, monitor payouts, and manage re-topups.

3. THE LOCKED MATRIX VAULT SCREEN & 21-DAY COUNTDOWN (/MATRIX)

When users click the Matrix navigation tab during Phase 1, they do **NOT** see an active purchase interface. Instead, they see the **Locked Matrix Vault** with a 21-day countdown:

MATRIX VAULT (LOCKED STATE)COUNTDOWN ACTIVE

PHASE 2 MATRIX IS LOCKED

18d : 14h : 22m : 10s

Normal \$30 ID matrix seats will start filling dynamically on **Day 22!** Secure your Phase 1 Genesis Council seat now to capture 35% global matrix royalties.

⚡ CRITICAL DESIGN DIRECTIVE FOR THE LOCKED SCREEN:

Do **NOT** allow users to buy matrix slots during Phase 1.

The 21-day countdown must be visually prominent with flip-clock animations.

Highlight that when Day 22 arrives, the \$30 normal ID seats start filling dynamically, and 35% of all volume automatically flows to Phase 1 DAO members!
